## Professional Summary

Results-driven and self-motivated **Java Full Stack Developer** with hands-on experience in **designing, developing, and deploying scalable enterprise applications**. Skilled in **Java, Spring Boot, REST APIs, SQL, and web technologies**, with proven expertise in **system optimization, clean architecture, and writing maintainable, efficient code**. Adept at collaborating in **Agile environments** and integrating backend services with secure, high-performance solutions.

## Technical Skills

**Programming** : Java, SQL, JavaScript.

**Web Technologies** : HTML, CSS, REST APIs, JSON

**Framework** : Spring Boot, Spring Security, Hibernate, JPA

**Databases** : Oracle, MySQL, PostgreSQL, MongoDB

**Tools & IDEs** : Eclipse, IntelliJ IDEA, STS, VS Code, Git, GitHub

**Other** : Microservices, JWT Authentication, EurekaServer, Maven

## Education

### 1. BTech in Computer Science & Engineering

Ambalika Institute of Management & Technology, Lucknow.

UP, India

Aug 2025 – Expected 2028

### 2. Diploma in Computer Science & Engineering

Government Polytechnic Rajgarh Mirzapur with aggregate of 72%.

UP, India

Sep 2019 – Dec 2022

## Training

Full Stack Java Development Program | **Naresh I Technologies**, Hyderabad |

2024

## Work Experience

SOFTWARE DEVELOPER TRAINEE | **Numetry Technology**

Pune, India

- Designed and implemented Java Spring Boot applications with

Sep 2023 – Jan 2024

improved UI and business logic.

- Built REST APIs for integration with frontend systems.

- Optimized performance and ensured scalability.

- Implemented role-based authentication using Spring Security & JWT.

## Projects

### (1). Employee Management System (Spring Boot + REST API + MySQL)

- Developed a secure application to manage employee records including **user login, registration, profile management, and CRUD operations**.

- Implemented **JWT authentication and authorization**.

- Designed REST APIs for employee data management and integrated them with MySQL database.

### (2). Product Subscription Portal (Spring Boot + Hibernate + Oracle)

- Developed subscription-based system for product plans & payments.

- Designed REST APIs secured with Spring Security.

- Integrated Hibernate ORM with Oracle DB.

### (3). Email Messaging System

- Developed a user management module to store details such as **username, mobile number, email, and location**.

- Implemented **auto-generated passwords** for new users.

- Configured **dynamic email notifications** to securely deliver login credentials to users.

- Enhanced system reliability and improved user onboarding experience through automated messaging.

## Personal Strength

- Problem-solving and debugging skills

- Proactive and self-driven

I hereby declare that all the statements mentioned above are true, complete and correct to the best of my knowledge and belief.
